

In the coming new year, the ever rapidity of news, more carried through the social networks, keeps our intellect occupied and busy to feed our sense of insecurity. Our intellect is constantly solicited to take position in an ever cultural battlefield.

On the other hand, the sensitivity of our heart remains intact and innocent. The Spiritual appeal however does not resonate and we seem to be chasing ourselves toward small and puny objectives for quick self satisfaction.

Within the depths of ourselves, mankind keeps a divine affiliation, a presence of God within .
Christ said that the kingdom of God resides within us . Luke 17:21
“for behold the kingdom of God is with you”.

The presence of God within, appeals to our desire for perfection, redemption as for the whole humanity and its creation. The meditation process, as the chanting of the AUM mantra enables a contact with the divine, that responds in shedding our agitations, our fears of the unknown.

When the divine sparks will spring up in our heart, one will apprehend the limitless of the universe, the unity of all the creature in an ever inner and intuitive revelation. This is, in fact, the work of the intelligence of the heart in action versus the intelligence of the mind. One will no longer feel bound to the waste of one's life, but will fully partake in the human and God achievement of a glorious and redemptive state.
